

ALTA 1999 COPPER HYDROMETALLURGY FORUM

TABLE OF CONTENTS

SX-EW

Organic analysis as an Operating Tool for Copper Solvent Extraction

By A Moroney, K Dudley, Girilambone Copper Company, Australia, P Crane, G Wolfe, Henkel, Australia/USA

Solvent Extraction of Copper from Concentrated Feed Solutions

By T Moore, B Townson, C Maes, O Tinkler, Avecia Ltd (formerly Zeneca Specialties) Aust/USA/UK

Crud Formation

By M Virnig, S M Olafson, G A Kordosky, Henkel Corporation, USA

Polymer Concrete Cell Applications in Copper Electrofining and Electrowinning

By G J Karcas, CTI Ancor, Europe

Heap Leaching

Copper Heap Leach Testing, Interpretation and Scale-Up

By G Miller, T Newton, Egis Consulting, Australia

The Bingham Canyon Heap Leach/SX-EW Project: A 1999 Update

By L Esdaile, Rio Tinto Technology, Aust, B P Ream, Kennecott Utah, USA, W J Schlitt, Kvaerner Metals, USA

Low Material Handling Costs are Needed for Low Grade Copper Heap Leaching

By M H Col, Rahco International, USA

Loaded Organic Entrainment Reduction Using a Pacesetter™ Separator

By F Schoenbrunn, Baker Hughes, USA

Design & Operation of a Pinned Bed Clarifier in Solvent Extraction

By K G Baxter, Bateman, Australia, G D Richmond, Western Metals Resources, Australia, M White, Bateman Process Equipment, Australia

Copper and Cyanide Recovery Using Ion Exchange Resin

By R D Souza Costa, CVRD, Brazil, V A Leao, V S T Ciminelli, Federal University of Minas Gera, Brazil

Engineered Membrane Separation (EMS™) Systems for Acid Hydrometallurgical Solution Concentration, Separation and Treatment

By J J Mueller, D H Green, R Bernard, HW Process Technologies, USA, V Liebezeit, I Lawrance, HW Process Technologies, Australia

Control of Chloride with Molecular Recognition Technology at the Codelco Chuquicamata Plant

By J Matta, A Reghezza, J Vergara, Codelco, Chile, J B Dale, N E Izatt, R L Bruening, IBC Advanced Technologies, USA

Preliminary Results of an Investigation on the Mechanism of Bioleaching of Chalcopyrite

By G S Hansford, T A Furamera, M A Jaffer, B E Searby, University of Cape Town, Sth Africa

Pilot Results of the Recovery of Copper from Copper Sulfate Solutions Via Reduction in a Plug Flow Reactor

By R D van der Weijden, M A Reuter, V G Aurich, J A P Bottemat, Delft University of Technology, The Netherlands

The Application of Proven Oil and Chemical Industry SX Technology to Hydrometallurgy

By C J Bambar, R W Cusack, Koch Process Technologies, USA

ALTA 1999 COPPER SULPHIDES SYMPOSIUM

TABLE OF CONTENTS

Hydrometallurgical Treatment of Copper Sulphides – Are we on the Brink?

By A Taylor, M L Jansen, International Project Development Services, Australia

Design of the Mt Gordon Chalcocite Project

By K Baxter, C Kaiser, Bateman, Australia, G D Richmond, Western Metals Resources, Australia

The Commissioning and Operation of a Copper Sulphide Pressure Oxidation Leach Process at Mt Gordon

By G D Richmond, M A Christie, Western Metals Resources, Australia

Bateman Pulsed Column Technology for CU-SX in the New Activox® Process

By G D Johnson, H A Evans, Western Minerals Technology, Australia, E M Buchalter, R Kleinberger, R L Movsowitz, Bateman Projects, Israel, J Riordan, BMI

CESL Demo Plant for Gold/Silver Recovery from Copper Leach Residue

By D Jones, CESL, Canada

Chloride-Sulphate Leaching from Chalcopyrite Ores from Sabah

By R T O'Brien, Leadstar SDN BHD, Malaysia, C A MacDonald, Ausenco, Australia
N E Meadows, Straits Resources, Australia

Bioleaching of Copper Sulphide Concentrates with Mesophiles and Thermophiles

By D W Dew, R Muhlbauer, C van Buuren, Billiton Process Research, South Africa

Pacific Ore Technology's Bacterial Leaching of Chalcopyrite

By T Williams, C Hunter, Pacific Ore Technology, Australia, B Arnall, Ammtec, Australia
