

ALTA 1999 NICKEL/COBALT PRESSURE LEACHING & HYDROMETALLURGY FORUM

TABLE OF CONTENTS

Keynote Presentation

The Way Ahead

By Peter Matheson, P J Matheson Resources Consulting, Australia

Cobalt Developments

Browns Project: Increasing Value and Resource Utilisation by Innovative Process Design

By R Elvish, Consultant Metallurgist to Compass Resources, Australia

M Humphreys, Compass Resources NL, Australia

Recovery of Copper and Cobalt from Mixed Oxide-Sulphide Tailings Dumps in the Democratic Republic of Congo (DRC)

By G M Dunn, Hatch Africa, South Africa, D John, First Quantum Minerals Ltd, Canada

Technology Developments

QNI's Approach to the Successful Developing and Implementing of New Technologies

By S Barnett, I Skepper, QNI Resources Pty Ltd, Australia

Acid Pressure Leaching for the Treatment of Nickel Cobalt Feed Materials

By C J Ferron, R Swiniarski, Lakefield Research Limited, Canada

Bioleach Reactor Development and Design

By J D Batty, Billiton Process Research, South Africa, T A Post, Lightnin Mixers, USA

Thickening As Applied to Nickel Laterite Slurries

By J Wallace, Baker Process, Australia

Energy Minimization in Laterite Pressure Acid Leaching Systems

By M L Jansen, International Project Development Services, Australia, R Prince, A Connolly, University of Sydney, Dept of Chemical Engineering, Australia

An Investigation into the Feasibility of Extracting Scandium from Nickel Laterite Ores

By M Haslam, B Arnall, AMMTEC Ltd, Australia

Laterite Projects

Beneficiation of Ravensthorpe Nickel Laterite Ore

By G Miller, Comet Resources NL, Australia

Implications of Pressure Acid Leach Developments

By J O'Shea, John O'Shea & Associates, Australia

Experiences During Early Commissioning of the Bulong Nickel Operation

By G L Frampton, Bulong Nickel Operation, Australia & R D Buratto, B.K.K., Bulong Nickel Project, Australia

Engineering Aspects of the Cawse Nickel/Cobalt Laterite Project

By D Burvill, D White, Centaur Nickel Pty Ltd, Australia

Weda Bay Laterite Projects – Indonesia

By L A Clinton, M G Baillie, Weda Bay Minerals Inc, Indonesia

An Engineering Comparison of the Three Treatment Flowsheets in WA Nickel Laterite Projects

By R Mayze, Bateman Brown & Root, Australia

Recovery Processes

Development of Nickel/Cobalt Sulfide Precipitation Process From Laterite Pressure Acid Leach Liquor

By E C Chou, P M Rooke, Hazen Research, Inc, USA, J T Hanks, Phelps Dodge Exploration Corporation, USA

The Selection of a Hydroxide Precipitation/Ammoniacal Releach Circuit for Metal Recovery from Acid Pressure Leach Liquors

By M Steemson, Hydrometallurgy Research Laboratories, MIM Holdings Ltd, Australia

Production of Nickel from Autoclave Leach Solutions Using the Ammoniacal Route – Ramu Project Integrated Pilot Plant Operation Results

By A Mezei, R Molnar, I Todd, C A Fleming, Lakefield Research Limited, Canada

P Mason, Highlands Pacific Group, Australia

Electrowinning of Nickel from Sulphate Electrolyte – A Review

By S Jayasekera, J Kyle, Orestest Pty Ltd, Australia

Additional Papers

Oxidative Stability of Diluents in Co/Ni Solvent Extraction

By B Maxwell, S Rasdell, P Carlin, The Shell Company of Australia Ltd, Australia

Separation of Manganese from Nickel and Cobalt by Solvent Extraction

By C Y Cheng, A J Parket CRC for Hydrometallurgy, CSIRO Minerals, Australia

Western Minerals Technologys' Ammonia Regeneration Process

By G D Johnson & Y Zhuang, Western Minerals Technology, Australia

ALTA 1999 AUTOCLAVE DESIGN & OPERATION SYMPOSIUM

TABLE OF CONTENTS

World Nickel Outlook: 5 and 10 Years

By G Bacon, A Dalvi, E Krause & R Osborne, Inco Technical Services Ltd, Canada

Scale Formation in the Pressure Acid Leach Process

By C J Czerny, Oretest Pty Ltd, Aust., B Whittington, CSIRO Division of Minerals, Aust.

Design Aspects and Their Effects on the Commissioning of the Bulong Pressure Acid Leach Area

By R Clary, W E Brooks, SNC-Lavalin, Australia

Commissioning of Geho Autoclave Feed Pumps at Murrin Murrin & Bulong

By P Thissen, B v d Broek, Enviro Tech Pumpsystems Netherlands b.v, The Netherlands

Indirect Heat Exchangers for Lateritic Slurries

By Q K Tran, P Bartsch, A Maggs, ICF Kaiser Engineers & Constructors, Australia

Integration of Pressure Vessel Steel & Brick Lining Design

By D White, Centaur Mining, Australia, D J Malone, Stebbins, Australia, R Storms, T Crandall, C Phillips, Stebbins, USA

Evolution of the Materials of Construction for the Sulfuric Acid Feed Lance in the Autoclave Injection System

By M J Thayer, AstroCosmos Metallurgical, USA

Understanding the Behavior of and Preventing Problems with Titanium in Hydrometallurgical Pressure Leaching Equipment

By J S Grauman, Timet-Henderson Tech. Laboratory, USA, T Say, Titanium International, Aust

Titanium/Steel Explosion Bonded Clad for Autoclaves and Vessels

By J G Banker, Clad Metal Products Inc, USA, J P Winsky, Nobelclad, France
