

ALTA 2003 COPPER-8 TECHNICAL PROCEEDINGS

TABLE OF CONTENTS

Operations

Hydrometallurgical Operations at Olympic Dam

By Kym Dudley, Cognis Australia Pty Ltd (formerly WMC Olympic Dam Corporation Pty Ltd)
Brett Lawson, WMC Olympic Dam Corporation Pty Ltd, Australia

Radioactivity – An Issue That Must Be Addressed in Copper Processing

By S A Brown, R J Ring and D E Collier, Australian Nuclear Science and Technology
Organisation, Australia

Solvent Extraction/Electrowinning

SX Development at Dos Amigos in Northern Chile

By Dagoberto Ibaceta and Juan Garrido, Dos Amigos, CEMIN
Hans Hein and Gabriel Araya, Cognis, Chile

Evolution of a Copper Solvent Extraction Circuit: How Operating Parameters were Managed to Counter Varying Leach Solution Conditions throughout the Life of Girilambone Copper Company's Solvent Extraction Circuit

By David J Readett, Straits Resources Ltd, Mick Hanlon, Girilambone Copper Company
Kym A Dudley, Philip A Crane and J Murdoch W Mackenzie, Cognis Australia Pty Ltd, Australia

A New Concept – “Plant in a Pipe” SX Design

By Roger W Cuzack, Charles J Bambara and Kevin McLoughlin (in memoriam), Koch-Otto York, USA
Scot P Sandoval and Hector S Iglecias Jr, Phelps-Dodge, USA

The Continuous Improvement in Design of The Jameson Cell for SX-EW Applications

By Sarah DeBono and Wayne Anderson, MIM Process Technologies
David Readett, Straits Resources, Australia

Copper Electrowinning in the Absence of Acid Mist

By Sabdiel Mella, Rodrigo Villarroel and Alejandro Lillo, SAME Ltda, Chile

Commercial Operation of the FENIX Hydromet Iron Control System on Copper Electrowinning Solutions at Western Metals Mt Gordon Operation

By Richard Shaw, FENIX Hydromet, Australia
David Dreisinger, University of British Columbia, Canada
Eve Kusinski, Western Metals Copper Limited, Mt Gordon Operations, Australia
Geoff Richmond, Western Metals Copper Limited Technical Services, Australia
and Marcus Tomlinson, Ausenco Limited, Australia

Leaching of Copper Sulphides

The Intec Copper Process: (Electro) Winning Against the Odds

By Philip R Wood, Intec Ltd, Australia

HydroCopper™ – A New Technology for Copper Production

By Kari Hietala, Outokumpu Technology Oy, Olli Hyvarinen, Outokumpu Research Oy, Finland

Hydrometallurgical Processing of Copper Concentrates by Phelps Dodge at the Bagdad Mine in Arizona

By John O Marsden and Robert E Brewer, Phelps Dodge Mining Company, USA

The Commercialization of the GEOCOAT® Process for Chalcopyrite

By Todd J Harvey and Mark Sampson, GeoBiotics, LLC, USA
Nick Holder and Tracey Stanek, Lakefield Research Africa (Pty) Ltd

Copper/Cobalt

Status of the Kolwezi Copper/Cobalt Project

By Bernie Pryor, America Mineral Fields, UK and David Lunt, GRD Minproc Limited, Australia

Heap Leaching

The ROM Leach Testwork Program at El Abra

By W Joseph Schlitt, Aker Kvaerner, USA, Rodrigo Hernandez C, Aker Kvaerner, Chile
Maria Esther Lopez, Sociedad Contractual Minera El Abra

Ore Geo-Mechanical Properties and Effects on Copper Heap Leach Kinetics

By Graeme Miller, Sinclair Knight Merz Pty Ltd
A J Parker, CRC for Hydrometallurgy, Murdoch University
Division of Mining and Minerals Process Engineering, University of Queensland, Australia

Overview of Gangue Mineralogy Issues in Oxide Copper Heap Leaching

By Mal Jansen and Alan Taylor, International Project Development Services Pty Ltd, Australia
