

ALTA 2003 SX/IX World Summit

TABLE OF CONTENTS

Mixer-Settlers and Pulsed Columns: Where Are We Now and Where Are We Going?

By Mark F Vancas and Eliyahu Buchalter, Bateman Solvent Extraction, USA

Confirmation of Process Criteria for Pulse Column Plant Expansion

By Peter Bartsch, Sinclair Knight Merz

Brett Lawson, WMC Resources, Olympic Dam Operations, Australia

SX Applications for Nickel and Cobalt: Pros and Cons of Existing Processes and

Possible Future Developments

By Chu Yong Cheng, A J Parker Cooperative Research Centre for Hydrometallurgy/CSIRO Minerals, Australia

Existing and Potential Ion Exchange Applications in the Nickel, Cobalt and Copper Industries

By Jacolien Wyethe and Marthie Kotze, Mintek, South Africa

Electrostatic Hazards in Solvent Extraction Plants

By Peter Haig and Jodie Maxwell, Shell Chemicals

Theo Koenen, Shell Engineering Ltd, Australia

Solvent Extraction Entrainment Control Needs and Strategies

By Graeme Miller, Sinclair Knight Merz, David Readett, Straits Resources, Australia

Solvent Extraction Pump Mixers – Where to From Here

By Bill Baguley, Mixtec Philadelphia, Australia/USA

Copper SX Circuit Design and Operation – Current Advances and Future Possibilities

By Gary Kordosky, Cognis Corporation, USA

The Application of Ion Exchange Resins in Hydrometallurgy

By W H (Bill) Jay, Orettek Limited, Australia
