

CONTENTS

Process Technology

The Copperbelt Of Africa – New Plants And New Technology In Copper Hydrometallurgy

Gary Kordosky, Angus Feather & Gift Chisakuta – Cognis - USA/Africa

The Hydrometallurgical Treatment of Baja Mining's El Boleo Project for Cu, Co, Zn and Mn Recovery

David Dreisinger & Eric Norton – Baja Mining Corp. – Canada, Ken Baxter & Michael Holmes (now with Bechtel) – Bateman Engineering Pty – Australia, & Ron Molnar – SGS Lakefield Research - Canada

An Electrochemical Study of The Dissolution Behaviour of An Alloy Produced From Smelted WEEE Materials

DR Groot, PC Pistorius & J. van der Linde – University of Pretoria – South Africa

SX-IX-EW

CFD Modelling of Hydrodynamics and Mass Transfer in Copper Electrowinning

Martin Leahy & Phil Schwarz – CSIRO Minerals - Australia

Selecting The Right Centrifuge – The Jargon Demistified

Nils Schwarz - Schwarz Global Consulting – South Africa

New Developments of Ion Exchange in Copper Processing

Richard Shaw, David Dreisinger, Stuart Arnold, Brenden Weekes & Heather Tinsman – Fenix Hydromet Australasia Pty Ltd - Australia

Flowsheet Alternatives For High Acid Consuming Ores

Andy Nisbett & Mark Urbani – Cognis – USA/Australia, & Ken Baxter & Kyle Marte – Bateman Engineering - Australia

The ACORGA[®] OPT Series: Comparative Studies Against Aldoxime:Ketoxime Reagents.

OS Tinkler & LP offman – Cytec Industries Inc. – South Africa, & M. Hangoma & GL Banza – Mitec Limited - Zambia

SX-EW Process Optimisation At Nyrstar Port Pirie – The Influence Of Employing The Correct Reagent Type

K. Dudley – KD Hydromet Consulting P/L – Australia, A. Horner – Nyrstar Port Pirie – Australia, M. Virnig, P. Crane & M. Urbani - Cognis – Australia/USA

Heap Leaching

The Effective Particle Size In Heap Leaching

Graeme Miller – Miller Metallurgical Services - Australia

Look Before You Leach: Dynamic Simulation of Heap Leach Flowsheets

Brett Muller & Tim Newton – Simulus - Australia

Materials

Sizing Considerations for Acid Brick Lining Systems for Large Hydromet Process Vessels

Kevin Brooks – Koch Knight LLC - USA

Hydromet Treatment of Chalcopyrite Forum

Why chalcopyrite is Difficult to Fully Dissolve

Craig Klauber– CSIRO Minerals - Australia

Heap Leach Research at Mintek

Petrus van Staden - Mintek – South Africa

Laboratory and Demonstration Scale Optimisation of the Quebrada Blanca Heap Leach Bacterial Regime Using GEOLEACH™

P. Harvey, L. Pretorius & M. Gunn – Geobiotics LLC - USA/Australia

Recovery of Metal Oxides and Associated Acid From Process Solutions Using Water as Reagent

Bryn Harris & Carl White – NeoFerric Technologies Inc. and George Demopoulos & Levente Becze – McGill University - Canada

Gold Recovery from Chalcopyrite Concentrates in the HydroCopper® Process

Pia Sinisalo & Kari Hietala – Outotec Research Oy - Finland

NSC Pressure Leaching: Industrial And Potential Applications

Corby Anderson – Center for Advanced Mineral and Metallurgical Processing – USA

Treatment of Copper Sulphide Deposits – Evaluation of a Galvanox™ Versus Sepon Circuit Configuration

KJ Miller, LA Sylwestrzak and KG Baxter – Bateman Engineering Pty Ltd - Australia

Construction and start up of the Freeport-McMoRan Concentrate Leach Plant at Morenci, AZ

John Wilmot – Freeport MacMoRan Copper & Gold Inc. - USA
