

## CONTENTS

### **COMINAK- SOMAÏR: Two Uranium Plants in Niger**

*Bruno Courtaud and Jaques Thiry – Areva - France*

### **Multiple Hearth Furnace for Uranium Yellowcake Production**

*Kevin Barbar – Jord International - Australia*

#### **Solvent Extraction**

### **Physicochemical Origin of the Degradation of the Trioctylamine-Tridecanol-Kerosene Solvent for the Recovery of Uranium: A Key for a Parade**

*Gérard Cote and Alexandre Chagnes - Université Pierre et Marie Curie - France and Bruno Courtaud and Jaques Thiry – Areva - France*

### **Degradation Problems With Uranium Solvent Extraction Organic**

*Angus Feather, Michael Virnig, Jack Bender and Phil Crane – Cognis – South Africa/USA/Australia*

### **Computer Simulation of Flow Sheets for the Solvent Extraction of Uranium: A New Route to Delay the Effect of the Chemical Degradation**

*Gérard Cote and Alexandre Chagnes - Université Pierre et Marie Curie - France and Bruno Courtaud and Jaques Thiry – Areva - France*

### **Differentiating the Honeymoon Uranium Process Flowsheet**

*S. La Brooy, D. Spratford, and B. Middlin – Ausenco - Australia and K. Otto – Uranium One - Australia*

#### **Ion Exchange**

### **Comparison Of Various Anion Exchange Resins for The Recovery of Uranium by Means Of RIP**

*V. Yahorava, J. Scheepers and M.H. Kotze – Mintek – South Africa*

### **Notes of Practical Application of Ion Exchange Resins In Uranium Extractive Metallurgy**

*Johanna van Deventer – Purolite International Limited – South Africa, and Mikhail Mikhaylenko – Purolite International Limited - Russia*

#### **Process Design**

### **Integration of an Acid Plant into a Uranium Extraction Plant**

*Grant Harman – SNC Lavalin - Australia*

### **Uranium Hydrometallurgy Circuits-An Overview - Part 1: Leaching Processes**

*Irena Ivanova, Kevin Frazer and Kenneth Thomas – Hatch – Australia/Canada, and Murdoch Mackenzie - Consultant - Australia*

### **Leach and Rheological Behaviour of Clay Gangue Minerals Present in Uranium and Copper Tails**

*Jonas Addai-Mensah - Ian Wark Research Institute/University of SA - Australia*

### **The Agitation of Uranium Leach and Resin-in-Pulp Applications**

*Bill Bagueley – Mixtec - Australia*

### **Recent Developments in CCD Circuits**

*Gary Whitford – GKD Delkor – South Africa*

### **Water and Carbonate Balances in an Alkaline Uranium Extraction Circuit**

*Mike Dry – Arithmetek - Canada*

### **Benefit of Upfront Mineralogy (QEMSCAN)<sup>®</sup> in Developing Metallurgical Testwork Programs for Uranium Ores**

*Peter Adamini and Tomas Hrstka – SGS Minerals Metallurgy - Australia*

#### **Uranium Heap Leaching Forum**

### **Uranium Heap Leaching Gaining Popularity**

*Alan Taylor – ALTA Metallurgical Services - Australia*

### **Heap Leaching of Low Grade Uranium Ores at Somaïr**

*Nicolas Derupt – Areva - France*
