

Lithium-Battery Technology Contents

	Page
Keynote Address: <u>Trends and Developments in Lithium Processing</u> Grant Harman, Lithium Consultants Australasia, Australia	2
<u>Process Modelling Based Prospective Life Cycle Assessment: A Case Study With Primary Lithium Production</u> Mike Dry, Arithmetek/Minviro, Canada/UK	21
<u>Innovation Driving a Comeback of Western Australian Lithium Projects</u> Damian Connelly, METS Engineering, Australia	39
<u>LieNA® Spodumene Caustic Conversion Process – Initial Piloting</u> Chris Griffith, ANSTO Minerals, Australia	83
<u>Synthesis of Li-Titanate Battery Material</u> Goutam Das, CSIRO Energy/CSIRO Mineral Resources/ Neometals, Australia	103
<u>The Development of The Battery Grade Lithium Hydroxide Monohydrate Flowsheet to Meet The Demands of Widely Varying Feed Chemistry</u> Nipen M. Shah & Angelo Ridout Jord Proxa, Australia/South Africa	133
<u>New Reagents for Beneficiation of Lithium Ores</u> Tim Walsh, Clariant Mining Solutions, Australia/India	159
Battery Technology Development	165
<u>Techno-Economic Evaluation of a Conceptual Battery Manufacturing Plant</u> Nawshad Haque, CSIRO Energy/CSIRO Mineral Resources/ CSIRO Energy, Australia	
<u>State of Lithium-Ion Battery Recycling in South Korea</u> Mooki Bae, Korea Institute of Geoscience and Mineral Resources (KIGAM), South Korea	184
<u>The Development of the Neometals Lithium-Ion Battery Recycling Process</u> Gavin Beer, Neometals Australia	194
<u>Potential Future Game-Changers in Battery Technology</u> Professor Guoxiu Wang, UTS Centre for Clean Energy Technology, Australia (not available)	225
<u>The Next-Generation Lithium-Ion Battery</u> Adrian Griffin, Lithium Australia/VSPC Limited, Australia	226
<u>Li-ion Recycling Economics – Is Public Policy Needed For Robust Resource Recovery?</u> Joshua Velson, NexantECA, USA	238
<u>Opportunities for Battery Recycling in Australia</u> Yanyan Zhao, CSIRO Energy/Melbourne University, Australia	257
