

Nickel-Cobalt-Copper Contents

DAY 1	Page
Opening Address: <u>Nickel: Critical to a Sustainable Future</u> Richard Matheson, <i>Director, Marketing Development, Nickel Institute, Australia</i>	2
Keynote Address: <u>Keys to A Successful Nickel Laterite HPAL Design and Operations: A First Hand Experience</u> Lourdes Valle, <i>Process Engineering Manager, Arafura Resources, Australia</i>	25
<u>Reprocessing Spent Cathode Material from Lithium-Ion Batteries: Modelling the Aqueous Chemistry of Precipitation (Ipsium Cave – Hic Esse Dracones)</u> Mike Dry, <i>Arithmetek, Canada</i>	44
<u>A Critical Assessment of Re-Processing the Cathode “Black Mass” from Spent Lithium-Ion Batteries</u> Bryn Harris, <i>NMR360, Canada</i>	60
<u>The Tech Project – Path to Production</u> Boyd Willis, <i>Queensland Pacific Metals, Australia</i>	80
<u>Synchrotron Analyses: Adding Value to Characterisation of Nickel and other Critical Energy-Metals in Mineral Ore and Mining Wastes</u> Jessica Hamilton, <i>Australian Synchrotron, ANSTO, Australia</i>	105
<u>Extraction of Nickel and Cobalt from Different Resources Using Alkaline Glycine Solutions</u> Elsayed Oraby, <i>Curtin University/Western Australian School of Mines, Australia</i>	135
<u>Digital Transformation using Simulation in a Project Life Cycle</u> Rob Winter, <i>KWA Kenwalt, Australia</i>	162
<u>Process and Agitator Design for Industrial Crystallization Processes</u> Wolfgang Keller, <i>EKATO, Germany</i>	171
<u>Brazilian Nickel's Piaui Nickel Project - Sustainable Nickel and Cobalt for a Low Carbon Future</u> Anne Oxley, <i>Brazilian Nickel, UK</i>	195
<u>The Future of Nickel in a Transitioning World: Modelling the Global Nickel Supply Chain and its Nexus with the Energy System</u> Jessie Bradley, <i>TU Delft, Netherlands</i>	215
<u>Deep Sea Polymetallic Nodules: Diversification of Supply</u> Chris Duhayon, <i>Global Sea Mineral Resources, Canada</i>	229
<u>Novel Collector Development for Nickel Flotation</u> Fatai Kolawole, <i>Clariant Mining Solutions, Sweden/India/USA</i>	247

DAY 2	Page
<u>Rising Demand Sets Challenges for Innovation in Nickel Sulphate Crystallisation</u> John Warner, <i>Jord Proxa, Australia</i>	253
<u>Design and Operation of Solvent Extraction Plants Using Two or More Extractant Systems</u> Murdoch Mackenzie & Graeme Miller <i>Murdoch Mackenzie Metallurgy/Miller Metallurgical Services, Australia</i>	261
<u>Acid Recovery Using Recoflo Ion Exchange</u> Katerina Kryst, <i>Eco-Tec, Canada</i>	286
<u>Moving Bed Ion Exchange Desorption for Base Metals Processing</u> Volha Yahorava, <i>CleanTeQ Water, Australia</i>	303
<u>Recovery of Copper from a Process Waste Stream</u> Tomasz Safinsk, <i>ANSTO/Newcrest Mining, Australia</i>	319
<u>Lewatit® Chelating and Solvent Impregnated Ion Exchange Resins for the Recovery and Refining of Battery Metals</u> Dirk Steinhilber, <i>Lanxess, Germany</i>	352
<u>The Potential to Toll Mill Congo Copper Cobalt Oxide Ore</u> Damian Connelly, <i>METS Engineering, Australia</i>	378
<u>A Sustainable Approach to Treating High Arsenic Concentrates Using the Toowong Process™ and the Glasslock Process™</u> Lachlan MacDonald, <i>Core Resources/Dundee Sustainable Technologies, Australia</i>	419
<u>Recovery Improvement in Treatment of Refractory Copper Ores Using Elevated Temperature Leaching- A Case of Konkola Copper Mines Zambia</u> Milton Simukoko & Trevor Chalwe, <i>Konkola Copper Mines, Zambia</i>	437
<u>Changes in the Global Mineral Composition of Copper Concentrates</u> Carlos Risopatron, <i>International Copper Study Group, Portugal</i>	445
<u>A Digital Tool to Optimise Solvent Extraction Performance</u> Andrew Bekle, <i>Solvay, Australia/ USA</i>	528
<u>Introduction Of Acorga® CR60LT In The Democratic Republic Of The Congo: A New Additive To Mitigate Crud Formation In SX Operations</u> Aidar Argyn & Andrew Bekle, <i>Solvay/Huayou, Kazakhstan/ Australia/DRC</i>	538

DAY 3	Page
<u>Plant Design Considerations for Large-Scale Filtration and Dry Stacking of Copper Tailings</u> Andrew Hawkey , <i>Diemme Filtration, Australia/Italy</i>	547
<u>Moisture Drainage & Seepage Analysis in Stockpiles</u> Enes Kaya , <i>Jenike & Johanson, Australia/USA</i>	560
<u>Implementation of Jetti's Catalytic Technology at Pinto Valley Mine to Enable Leaching of Low-Grade Chalcopyrite</u> Nelson Mora , <i>Jetti Resources/Pinto Valley Mining/Worley, USA/Australia</i>	580
<u>Coupled Dissolution-Precipitation Processes During Chalcopyrite Heap Leaching</u> Eric O. Ansah , <i>University of Melbourne, Australia</i>	592
<u>Heap Leaching Scale up Phenomena Quantified</u> Petrus van Staden , <i>Mintek, South Africa</i>	600
HPAL FORUM	616
<u>Capitalizing on Experience in Advancing the Autoclave Industry through Diversification</u> Jansen Scheepers , <i>Mogas, USA</i>	630
<u>Valve Evolution in Hydrometallurgy</u> Ross Waters , <i>C. G. Industrial Specialties (CGIS), Canada</i>	630
<u>Hydrometallurgical Pilot Plants: What they should, can and cannot do</u> Mark Benz , <i>MRB International Consulting, Canada</i>	641
<u>Advancements in Surface Modification for Severe Service Valve Trim</u> Evelyn Ng & Duncan Bews , <i>Callidus Process Solutions/Callidus Welding Solutions, Australia</i>	657
<u>Conversion Of Prony Resources'Goro Plant to Nickel Hydroxide Concentrate Production</u> Adrian Dickison , <i>Beca, New Zealand/Gabriel Bensimon</i> , <i>Prony Resources, New Caledonia</i>	668
<u>Benchmarking the HPAL Process</u> Mike Miller , <i>Mike Miller Consultancy Services, Australia</i>	682
